

A DJI Enterprise drone is shown in the foreground, resting on a gravel surface. The drone is black and silver, with four propellers and a camera mounted underneath. In the background, a red fire truck is visible, with a fire bell hanging from its side. The scene is set outdoors, likely at a fire station or a public safety facility.

dji ENTERPRISE

QUALIFIED ENTITIES PROGRAM (QEP)

DJI is committed to supporting national, regional, and local public safety agencies through enabling the full range of capabilities of our UAV products. These capabilities will serve operating scenarios in advanced, higher-risk applications. DJI is rolling out the Qualified Entities Program (QEP) to minimize operational restrictions for public safety partners that have been pre-verified.

Through the QEP, DJI will remove all domestic geofencing limitations and altitude limitations for enterprise aircraft. This will allow users to fly in sensitive locations and at higher altitudes, in order to enable critical operations such as disaster response, firefighting, search and rescue, and other public safety applications. Please contact your local enterprise dealer for more information.
